

Perfect Blend[™] (13.5 oz. aerosols)

M102-0780 (Gloss)
M102-0760 (Semi-Gloss)
M102-0740 (Satin)
M102-0720 (Matte)
M102-0710 (Flat)
M102-0705 (Dead Flat)

Product Description: Perfect Blend[™] aerosol is formulated to produce a soft spray and fine atomization which yields virtually no overspray and excellent flow out. Perfect Blend[™] is perfect for touch-up because the soft spray coupled with low solids gives it superior blending with the surrounding area so it does not create the “halo” effect. Perfect Blend[™] also offers excellent adhesion over waxed or polished surfaces, including silicone contamination and does adhere to most metals and plastics.

Advantages:

1. Easy to use.
2. Soft spray and fine atomization.
3. Excellent blend-in properties.
4. Excellent adhesion.

Dry time: Air dry @ 72 F, 35% relative humidity

To touch: 7 minutes

To handle: 15 minutes

Directions: Clean surface to be sprayed with Mohawk Wax Wash[™] Remover. For best results, can temperature should be 65° - 90° F. SHAKE WELL BEFORE USING for at least one minute after ball rattles to ensure sheen uniformity. Point opening of spray button toward object, holding can 12 to 14 inches away from surface to be coated. Press spray button firmly. Use steady, even strokes. Several thin coats give a better finish than one heavy coat. Allow coating to become tacky between coats. Clean spray button immediately by spraying with can upside down until no more product comes out. If clogged, remove spray button with a twisting motion and clean. Gently twist button onto can with opening turned away from you.
